MAHESH KULKARNI - SOFTWARE ENGINEER

mahesh.kulkarni1@outlook.com, Ireland +3530894159261 ◇ linkedin.com/maheshK ◇ www.leetcode.com/maheshK

EDUCATION

Bachelor of Computer Science, Vishwakarma University CGPA: 8.9/10 2017 - 2020
Relevant Coursework: Algorithms, Data Structures, Operating System, Computer Networks

SKILLS

Technical Skills **Java**, C++, C#, Angular, React, NodeJS, **MySQL**, **AWS**, **Kafka**, **Kubernetes**, Git, CI/CD
Spring Boot, Microservices, TDD, BDD, PostgreSQL, DynamoDB, Jenkins, **CHEF**, Terraform, Desig

EXPERIENCE – 5 YEARS

Senior Software Engineer Oct 2024 – Present
SOTI *Ireland*

- **Developed and maintained scalable, cross-platform applications** using Java, C#, and Angular, with a strong **user focus** and measurable **business impact**, aligned with enterprise-grade mobility management.
- **Wrote and shipped production-grade code** adhering to SOLID principles, contributing to all phases of the SDLC—**design**, testing, and **collaborative delivery**—within a cross-functional team.
- **Executed disaster recovery tests in AWS environments**, authored SRPs on CutOver tool, improving **resilience for high-availability systems**.
- Automated certificate management using centralized vaults, **reducing operational cost** and saving a full day of manual effort.

Senior Software Engineer (BA4) Aug 2020 – Sept 2024
Barclays *India*

- **Designed, implemented, and maintained backend Java applications** in a **cloud-native AWS environment**, driving high performance and availability.
- **Successfully migrated 4 on-premise apps to AWS** using **Service Catalog**, **CHEF**, and **Jenkins CI/CD**, supporting **multi-AZ**, **active-active**, high-volume systems with low latency.
- Leveraged infrastructure-as-code tools like **Terraform** and **AWS SAM**, integrated **Kafka**, Lambda, and SQS for event-driven architecture.
- Hands-on with EC2, ELB, S3, VPC, IAM, RDS, Lambda, CloudWatch, CloudFormation, Elastic Beanstalk, and Autoscaling.
- **Bridged infra gaps using VPCs, ELBs, CloudFormation stacks, and Service Catalog** for scalable, secure deployments.
- **Orchestrated Java deployments with CHEF**, reducing deployment time by 30% and improving artifact management across versions.
- **Drove architecture, design, and delivery**, balancing developer productivity, performance, and maintainability.

Java Developer Intern May 2019 – July 2019
Siemens *India*

- Developed a client app to query and visualize NoSQL data from **DynamoDB** using a **React** frontend, supporting rapid prototype delivery.

PROJECTS

Stock Market Prediction – Built a CUDA-parallelized ML system for market trend forecasting. Published in IEEE, 1st prize in Smart India Hackathon (EdTech track).
